SUMMARY

Backend and Data Engineer with 2+ years of hands-on experience building production-grade backend applications, RESTful APIs, ETL pipelines, cloud-native services using Python, Node.js, FastAPI, Fastify, TypeScript, Go, and SQL across AWS and Azure environments. Experienced in architecting microservices, multi-tenant architectures, database optimization, and data engineering solutions. Strong foundation in Data Science and Machine Learning with hands-on experience solving real-world business problems.

SKILLS

- **Programming Languages:** HTML, CSS, JavaScript, Node.js, Python, SQL, Go.
- **Frameworks:** FastAPI, Django, LangChain, Express.js, Fastify.
- **Databases:** MongoDB, MySQL, PostgreSQL.
- **Libraries:** Pandas, NumPy, Matplotlib, Scikit-Learn, PyTorch, TensorFlow.
- **Developer Tools:** UiPath Studio, Power BI, MySQL Workbench, VS Code, NPM, Git.
- **Cloud & Data Platforms:** Microsoft Azure, Amazon Web Services (AWS), Jupyter Notebook, UiPath Orchestrator.
- **AI & NLP:** RAG, LLMs, Predictive Modeling, Intelligent Automation.
- **Coursework:** OOP, DSA, DBMS, Machine Learning, Deep Learning, Data Science, RPA.
- **Soft Skills:** Excellent Communication, Organizational Skills, Adaptability, Problem Solving, Agile Mindset.

EXPERIENCE

Associate Data Engineer | **Plainsurf Solutions PVT** | Pune, Maharashtra, India

April 2025 – Present

- Enhanced the RAK-Mustawi platform by implementing a multi-tenant architecture and optimizing Node.js backend services with React.js frontend enhancements.
- Introduced WhatsApp notifications into the ECOEFX backend, automating customer communication workflows using Go.
- Modernized PARCMOTOR by migrating Express.js to Fastify, building RESTful APIs, and managing database migrations.
- Migrated 100+ SQL Server stored procedures into Go APIs while supporting HOSTNSELL backend modernization, architecture documentation, and .NET services.
- Developed 50+ RESTful APIs across six business modules for AUTOLINK, implementing authentication, customer management, invoicing, and payment processing.

Data Engineer Intern | **Plainsurf Solutions PVT** | Pune, Maharashtra, India

September 2024 – March 2025

- Utilized Azure Data Factory, Databricks, and Synapse Analytics for ETL, data cleaning, and pipeline orchestration.
- Engineered ETL workflows, automated data processing using AWS services including S3, Glue, Athena, IAM, and Redshift.
- Constructed a FastAPI microservice enabling CRUD operations across MySQL, PostgreSQL, and MongoDB.
- Built a RAG-powered chatbot using LangChain and Llama 3.2 to automate tasks such as flight and restaurant booking.
- Streamlined banking workflows using UiPath, integrating KYC bots, web scraping, and data extraction tools.

PROJECTS

CSV Analysis Using Django

December 2024 – January 2025

- Designed a Django app to upload CSVs, process data, and deliver user-driven visualizations with AJAX support.
- Analyzed CSV datasets, cleaned data, generated statistics, and created six interactive charts through dynamic graph selection.
- Applied preprocessing techniques to handle missing values, manage date formats, and optimize numeric transformations.
- Optimized UI functionality using AJAX to enable efficient user interaction and dynamic chart rendering.

Multi-Database CRUD Microservice with FastAPI

September 2024 – October 2024

- Implemented a production-ready FastAPI-driven CRUD microservice supporting MySQL, PostgreSQL, and MongoDB.
- Strengthened security with JWT authentication across secured API endpoints and role-based access control for users.
- Structured a modular backend enabling multi-database operations with scalable system design.
- Developed comprehensive unit and integration tests to ensure data integrity, system reliability, and consistent performance.

Persona Prediction Via Resume Analysis Using ML

November 2022 – February 2023

- Created a recruiting system to automate candidate selection based on eligibility criteria and personality assessment.
- Enabled applicants to submit their data and complete an online assessment for candidate personality categorization.
- Applied Logistic Regression and Random Forest classifiers to analyze resumes and predict candidate suitability based on personality traits.

EDUCATION

RMD Sinhgad School of Engineering – Pune, Maharashtra, India

Bachelor of Engineering – Information Technology | CGPA: 8.45

August 2019 – July 2023

CERTIFICATES

- **UiPath Automation Associate Developer** – UiPath Academy January 2025
- **Data Analytics and Visualization** – Accenture March 2024
- **Introduction To Data Science** – CISCO October 2023
